DETAILED ACTION

Claims 52 and 54-61 are pending in this application.

Election/Restriction

Applicant's election of Group V in Paper No. 7 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). It is further acknowledged that the claims have been amended to in conformity with the election.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Art Unit: 1624

Claims 52 and 54-61 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 32 and 14-21 of prior U.S. Patent No. 5,739,141. This is a double patenting rejection.

Claim Rejections - 35 U.S.C. § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 52 and 54-61 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In the claims, the phrase "carbonyl carbon of the amido group" is not understood. In the structural formula V, R⁴ is not always an amino group and therefore, when R⁴ is not an 'amine', there is no 'carbonyl carbon of the amido group' present in the compounds of formula V. Therefore, the recitation is confusing.

Receipt is acknowledged of the Information Disclosure Statement filed on August 2, 2002 and a copy is filed herewith.
